Leave your ego at home

Empathy is the capacity to understand or feel what another being is experiencing from within the other being's frame of reference, i.e., the capacity to place oneself in another's position.

Everybody thinks their dog is the coolest

Assertive communication is the ability to express positive and negative ideas and feelings in an open, honest and direct way. It recognises our rights whilst still respecting the rights of others. It allows us to take responsibility for ourselves and our actions without judging or blaming other people.

Assertive communication and situational awareness

- Background checks
- Respect
- Empathy, calmness, friendliness
- Active listening
- No preconceived ideas
- Focus on issues not behaviour
- Firm but fair
- Remain aware

Active listening is a communication technique that requires the listener to feed back what they hear to the speaker, by way of re-stating or paraphrasing what they have heard in their own words, to confirm what they have heard and moreover, to confirm the understanding of both parties.

Situational awareness- drugs and alcohol

Visitors take trip to hospital after using LSD

Eight young adults from metropolitan Adelaide sought treatment at Maitland and Wallaroo hospitals after using lysergic acid diethylamide (LSD) at a Yorke Peninsula campground on Saturday, February 24.

The young adults were among a large group camping at the Bamboos Campsite north of Balgowan, where one female started to feel unwell after taking the drug.

One other female and six males went to hospital complaining of hallucinations as a result of the psychedelic drug.

There was no further harm caused or lives threatened.

Summary

- Leave your ego at home
- Fight or flight response
- Empathy
- Avoid preconceived ideas
- Assertive but fair
- Situational awareness -listen to your gut
- Drugs and alcohol
